

 Hands-On™ Web CMS

Simple. Powerful. Effective.

Web CMS from the world's leading developer of Hospitality websites

Hands-On™ Web CMS is an easy-to-use suite of website management tools that enables non-technical users to maintain a dynamic web presence without compromising excellence in design or functionality.

Hands-On™ Web CMS provides all the capabilities of an enterprise level web content management system in an affordable and cost effective software-as-a-service solution. A variety of configurations are available, ensuring that each customer gets the system that best fits their needs *and* their budget.

Because Interactive Sites is there to manage the complexities of design, implementation, and development, our clients can focus on what's most important: *providing their website guests the latest information and the most rewarding experience possible.*

“*The beauty of this application is that you can't hurt anything. Empowering the team to make edits (update job postings, specials....) is easy.*”

*Lisa Maria Stice
Corporate Director of Internet Marketing
Tiburon Hospitality Management*

- “Canned App” compatibility

Our CMS Vision

Process

Hands-On™ Web CMS is the culmination of over ten years experience in delivering successful web solutions to the hospitality industry. Along the way, Interactive Sites has adopted widely accepted best practices and refined these into a set of well defined web development processes. These processes – derived from real world experience – are the foundation of our CMS vision.

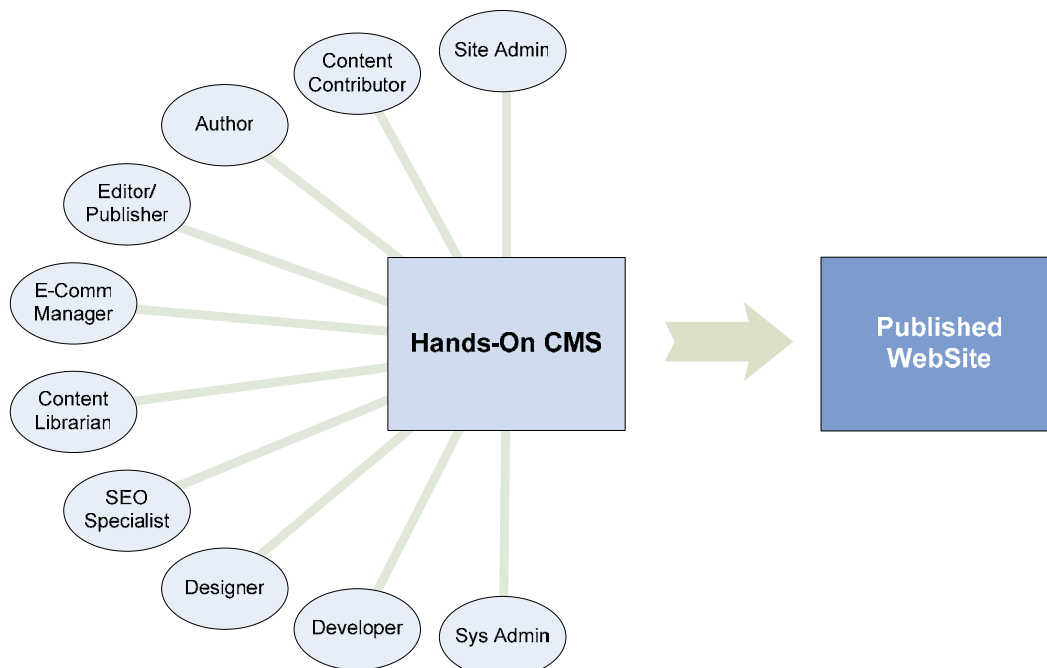

Collaboration

Successful web development requires teamwork. Content contributors, editors, designers, programmers, search engine specialists, marketers and managers each play an integral part throughout the development lifecycle. Hands-On™ provides a collaborative role-based environment that allows each team member to focus on their core competency without compromising the efforts of others.

Clear Purpose

To provide an intuitive and cost-effective framework that facilitates the successful deployment and long term management of our customers' web sites. Our Web CMS is designed with an emphasis on ease of use. This is reflected not only in the uncluttered elegance of its user interfaces, but also in the selective availability of specific features to certain users at a given moment. The result is a real world content management solution that delivers real world results.

Collaborative web development environment

About Interactive Sites
